

User Acceptance Testing:

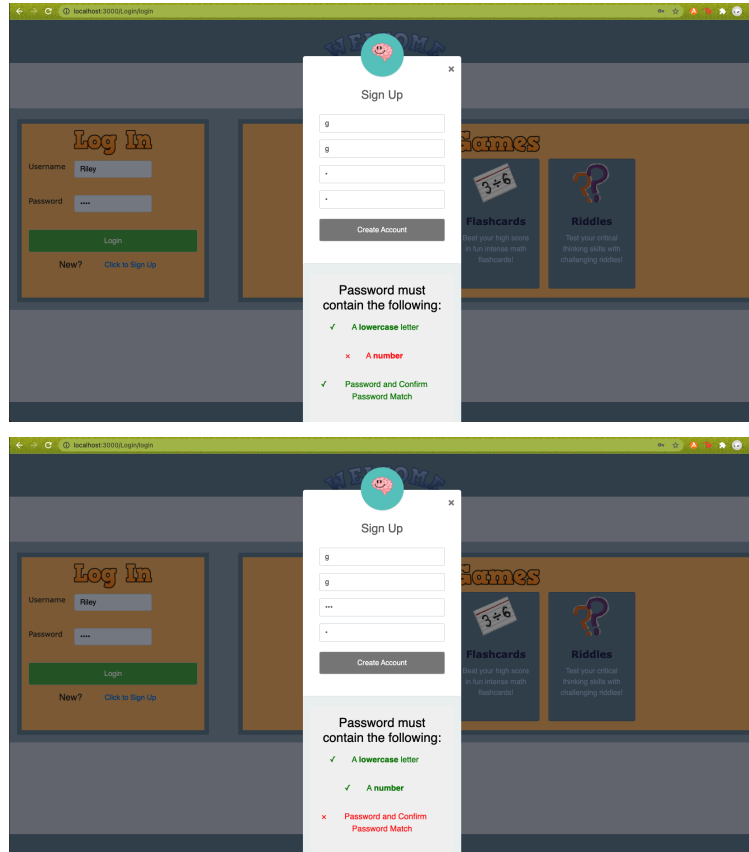

- Test Script 1t: See if login page works - Riley logs in with his user-name and password, and he is forwarded to the home page showing the logout button.

Test Script 2: See if riley can make a new username, name email and password matching are done correctly

- Test Script 4: See if the login dropdown checkmarks work
 - Didn't include a number in the password -> results in an X, preventing creating a user
 - See if when riley logs in with the wrong password he cannot get ot the home page

Test Script 5: Check if the supervisor variable works, when you're a supervisor there is a flag when you check the scoreboard

Rank	Username	Boat game high score	Boat game attempts	Flashcards high score	Flashcards attempts	Riddles high score	Riddles attempts
